Main Components & Features

Responsive Layout

Navigation Bar

Social Media Links

Hover

User Focused Design

Design Portfolio

Contact Form (layout only)

Skills Section

Feed-style Blog

Keyframes

Animatimated Cover

Coding Portfolio

Media Breaks

Sticky Footer

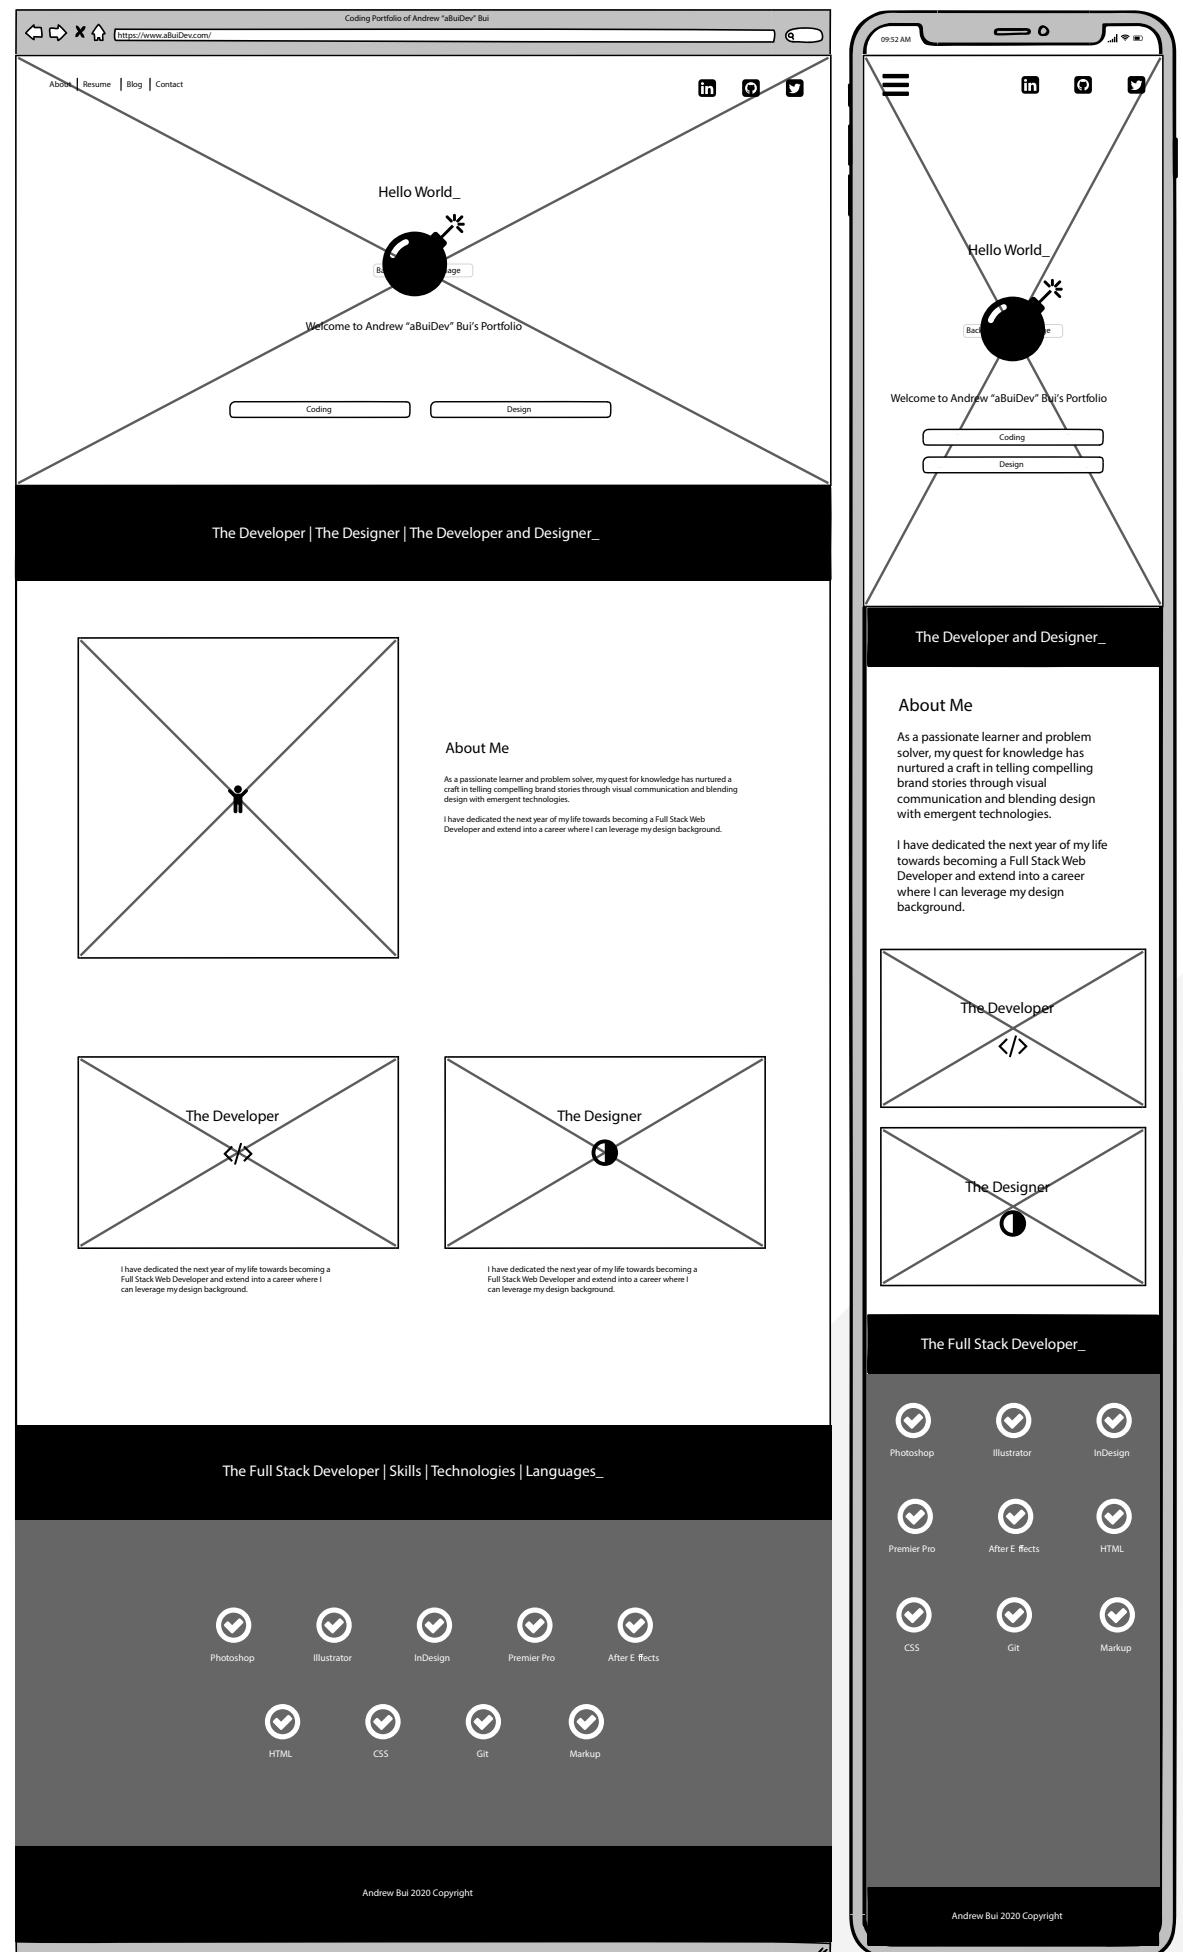

The elements and components all work together both visually and functionally to create an intuitive and highly impactful user experience as laid out in this user story:

**AS A USER WHO IS LOOKING FOR A DEVELOPER TO JOIN THE TEAM
I WANT TO VIEW A VISUALLY ENGAGING AND HIGHLY TECHNICAL PORTFOLIO WEBSITE
THAT KEEPS ME ENGAGED, IS VISUALLY/STYLISTICALLY COLLATED
AND GIVES ME EASY ACCESSIBILITY TO CONTACT/REACH OUT TO THE DEVELOPER.**

Structure | Home Page

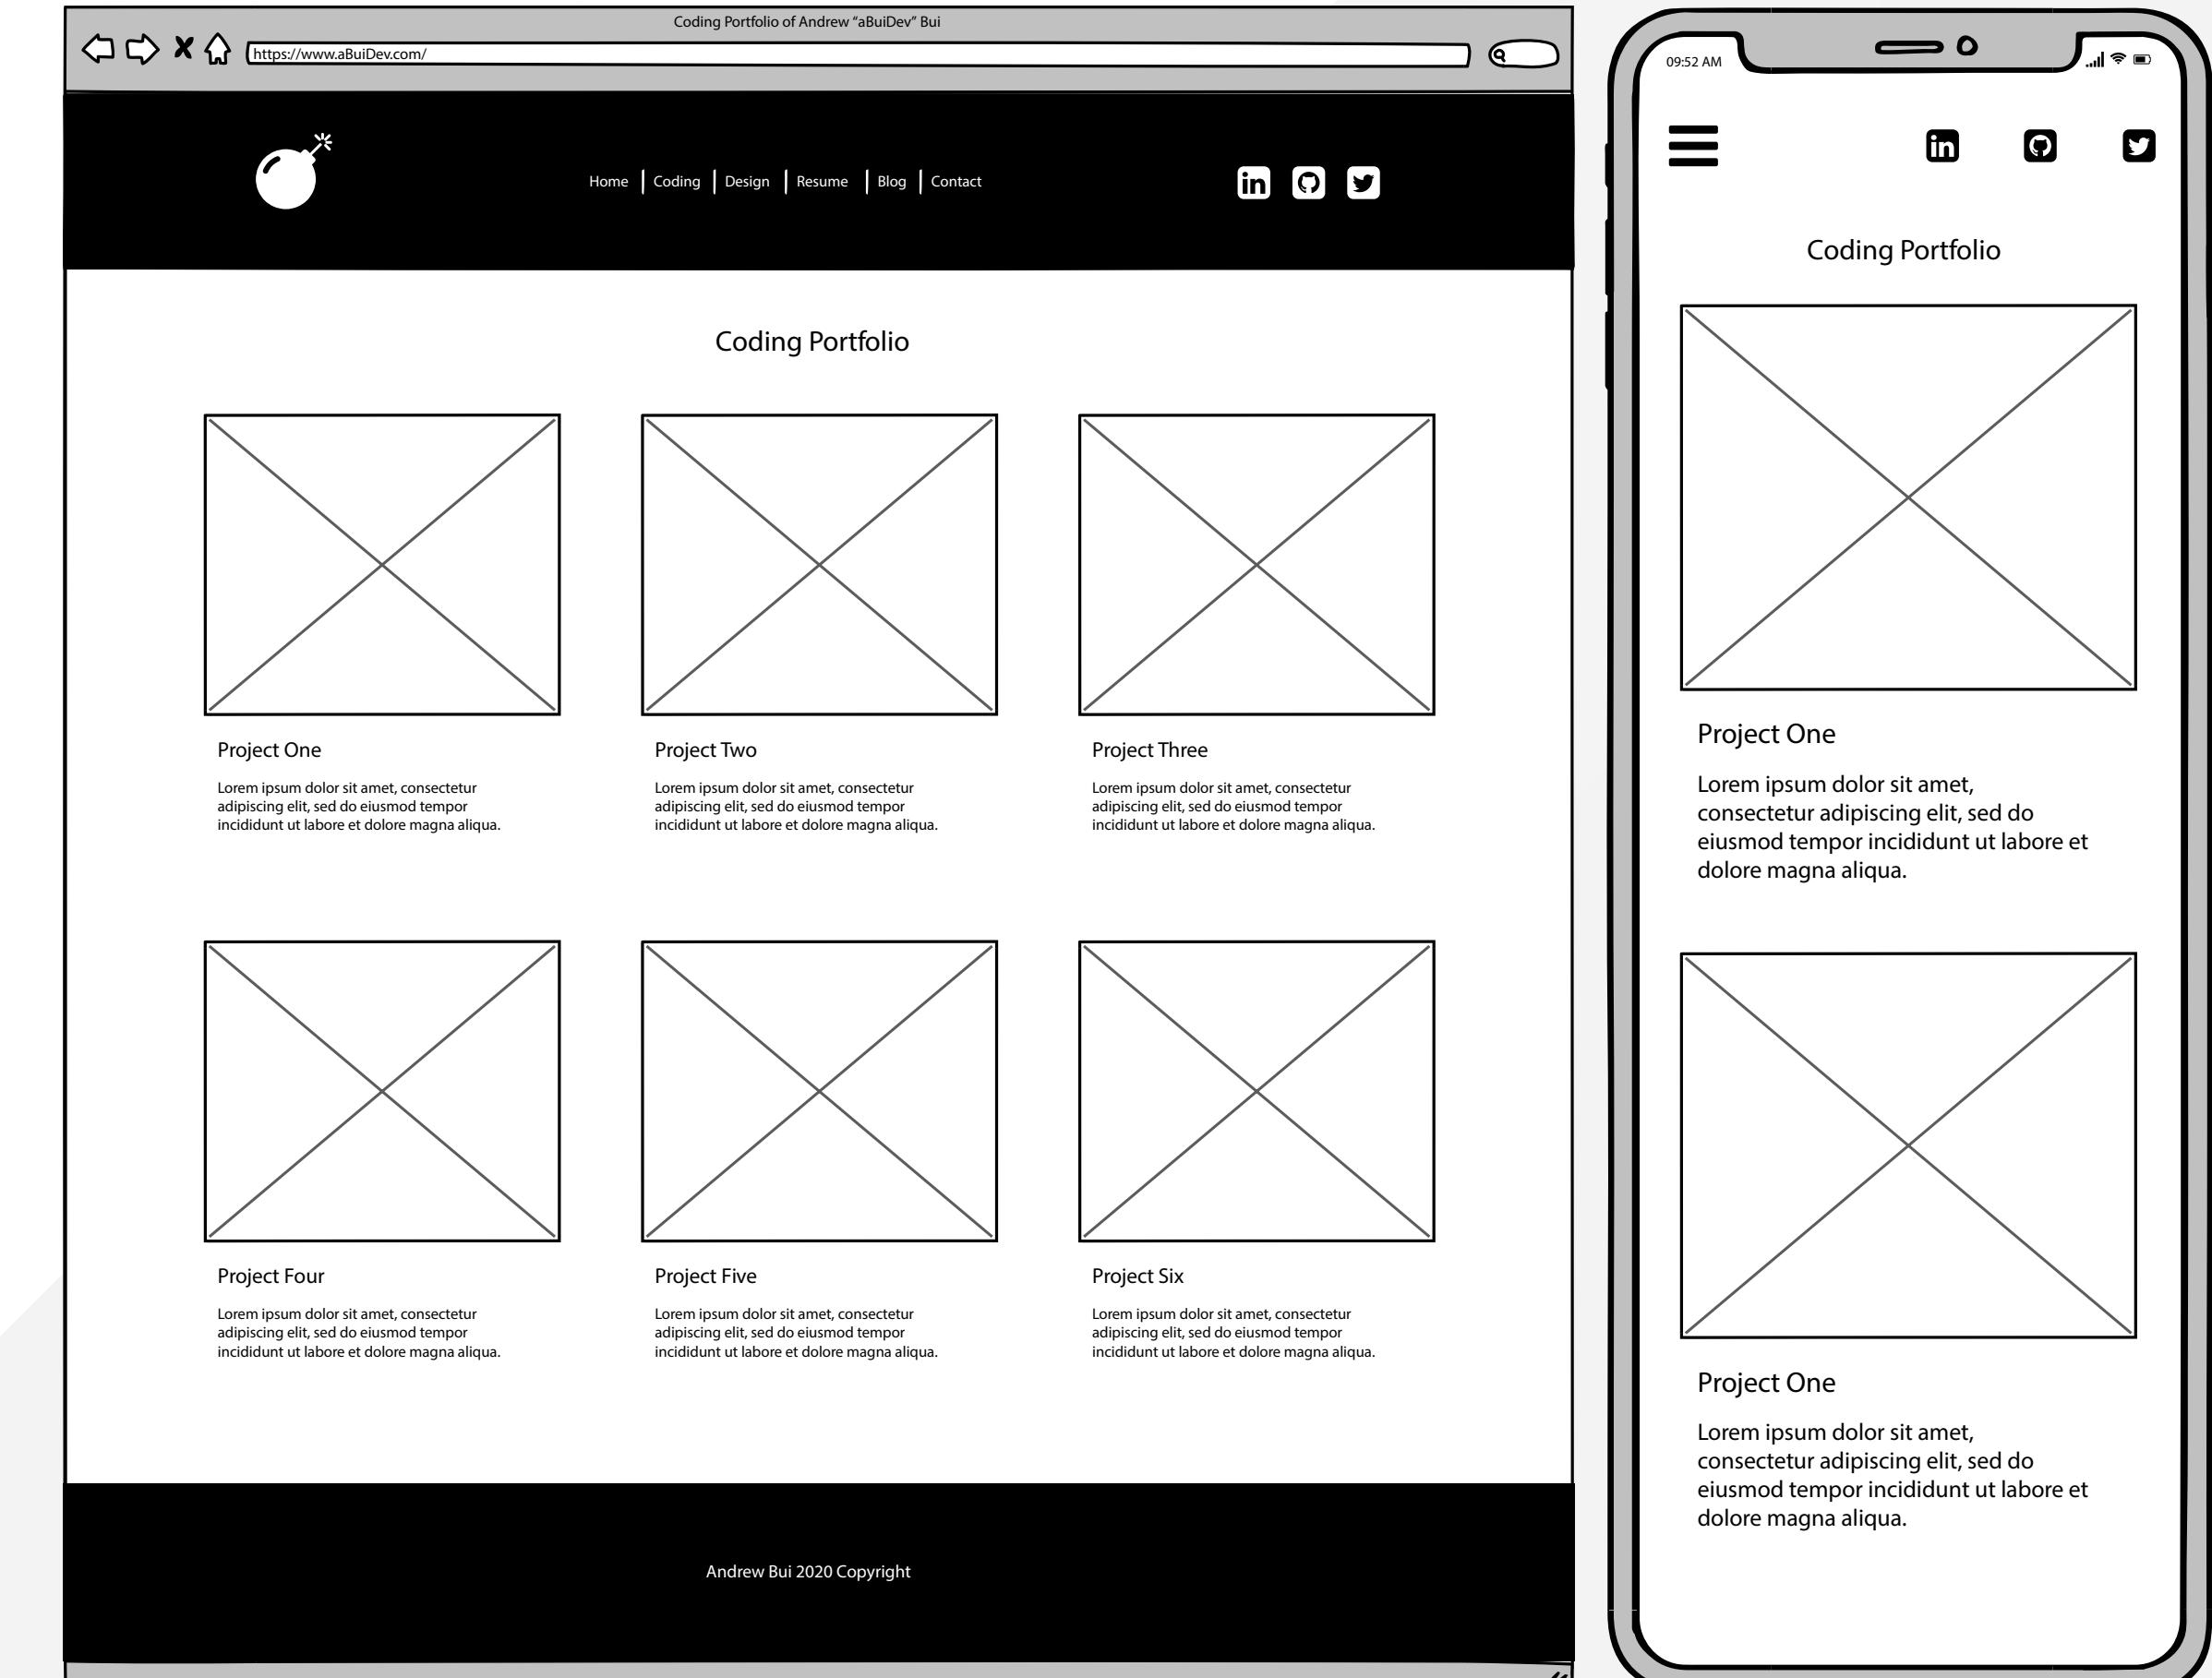

Cover image with embedded navigation bar menu & social media links

Main page body focuses user attention to view coding or design portfolios.

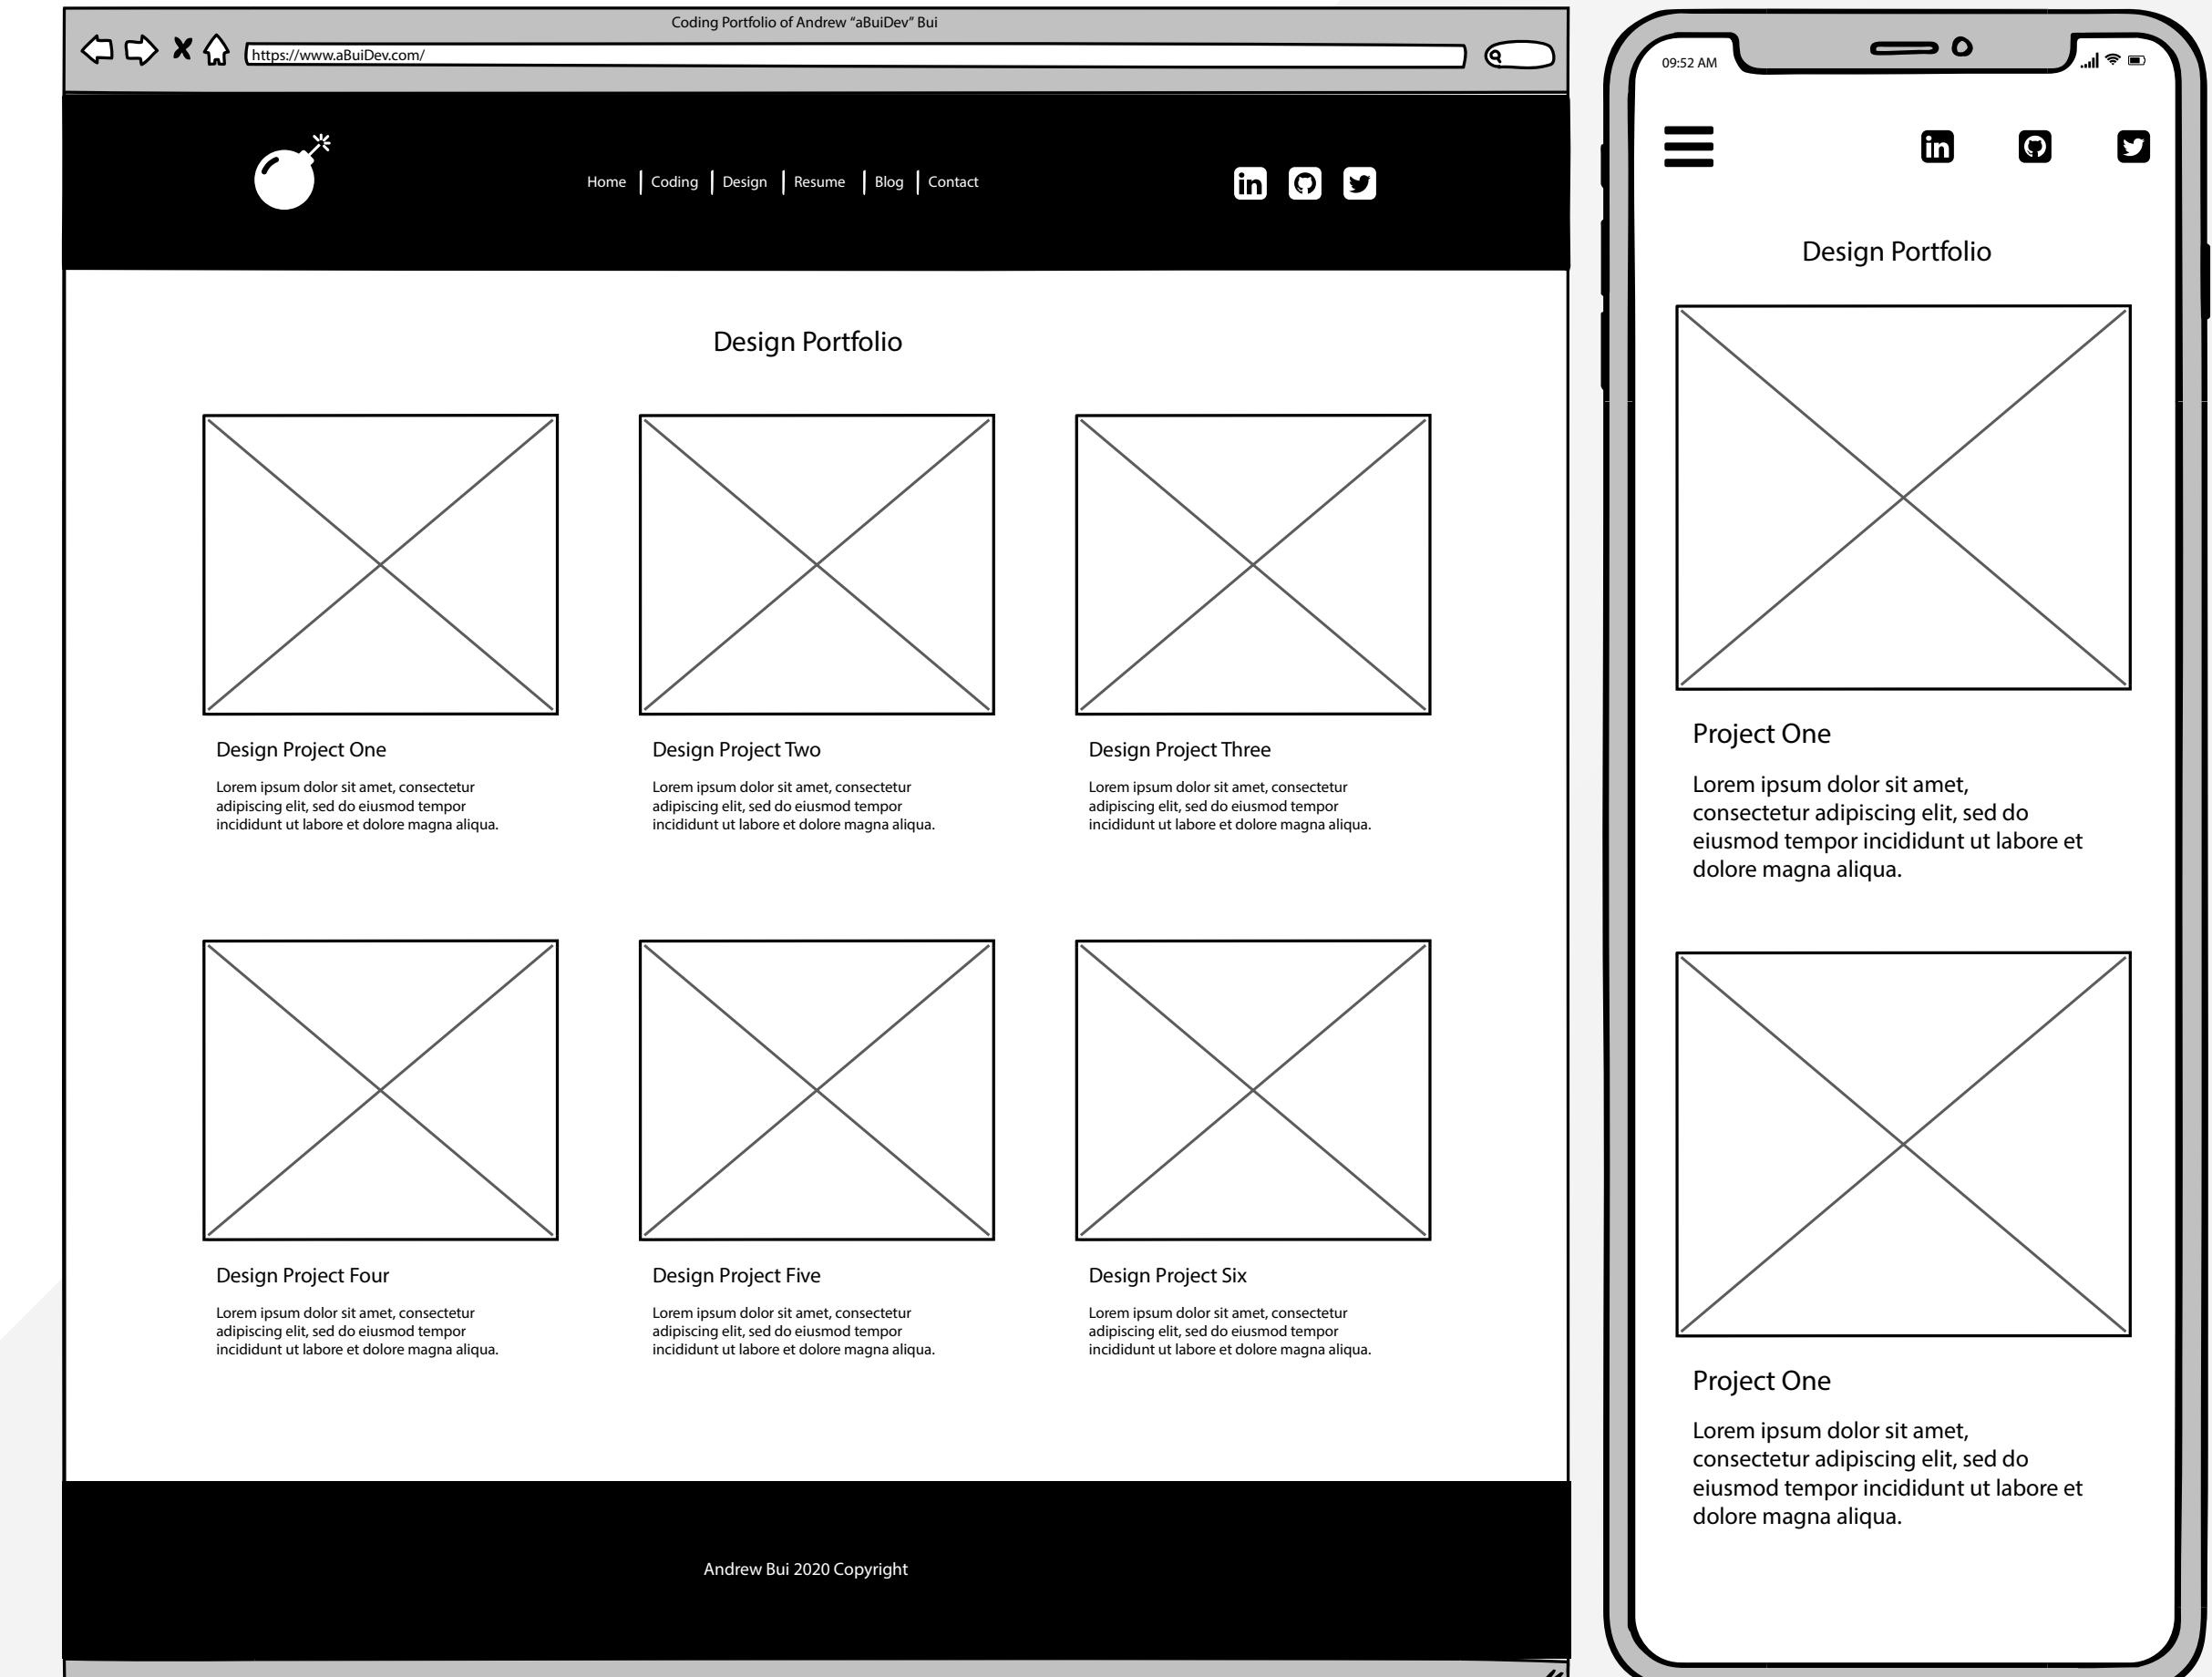

Coding page is structured in a way where users can easily identify project via designed icon that represents project.

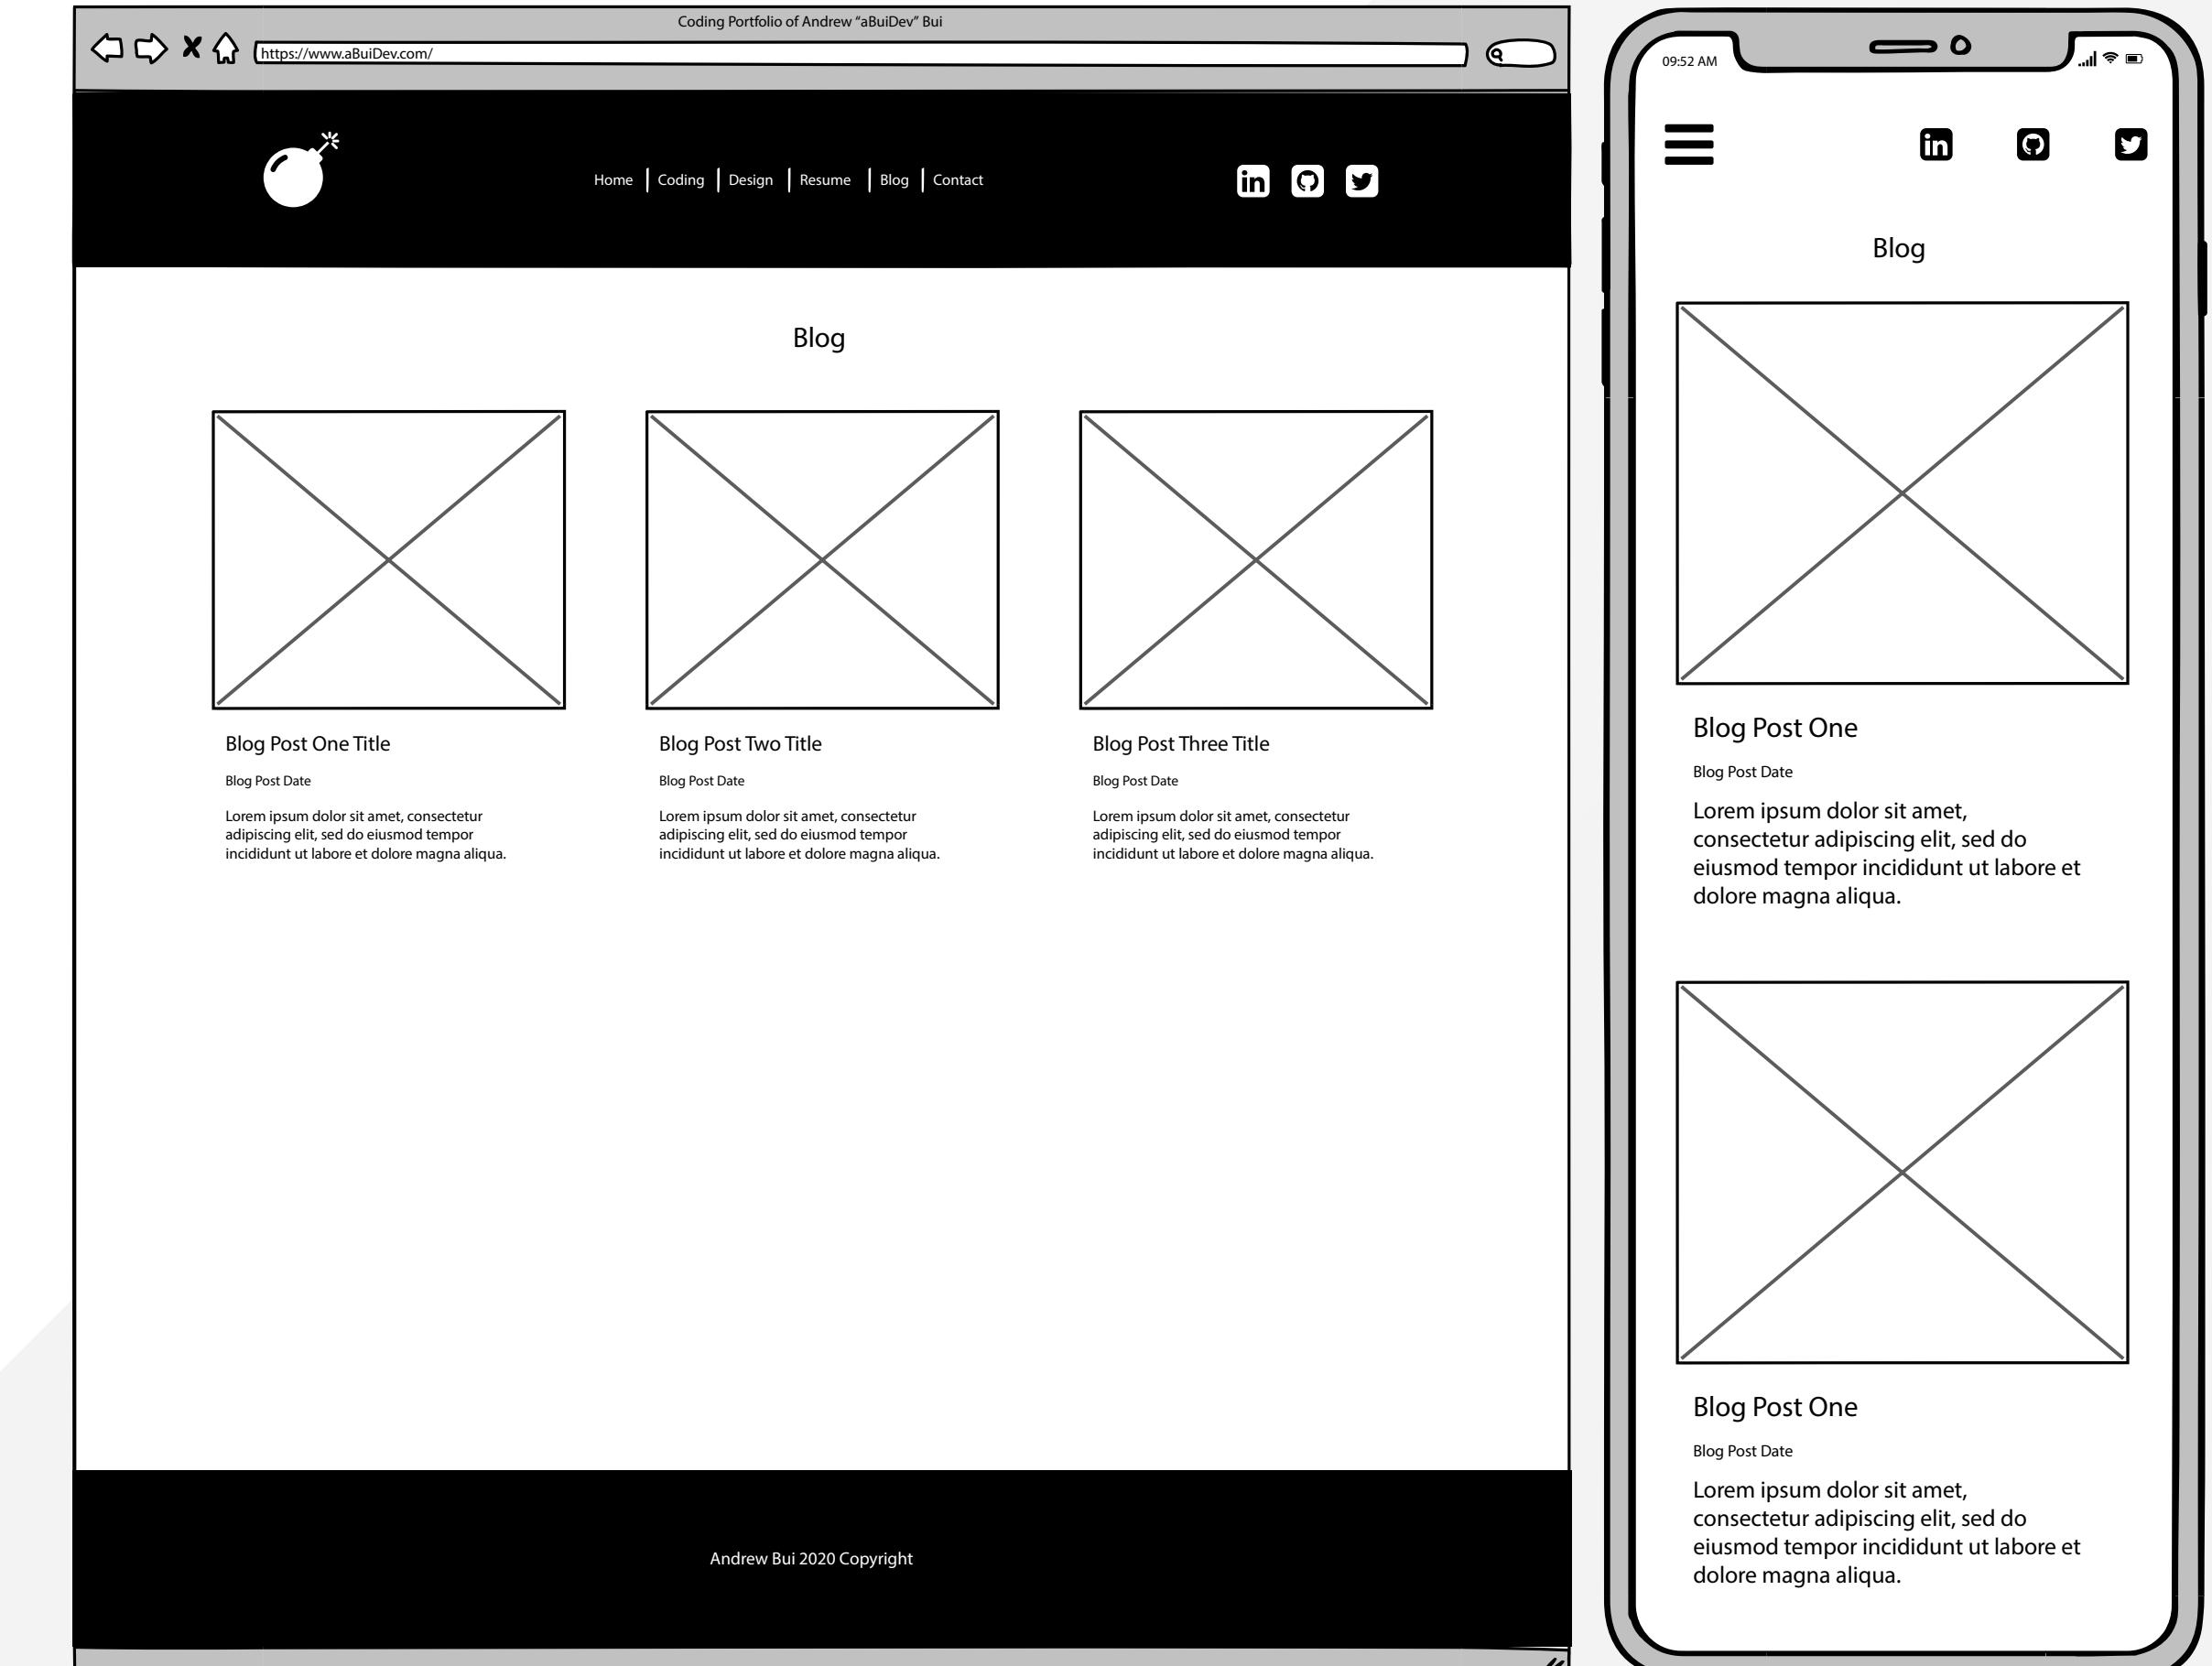

Structure | Design Page

Design page is similar to coding page in layout, however link elements will be represented at a larger scale.

Blog page will be a similar layout as coding and design portfolio pages to cross over layout / UI / UX accross all the pages for uniformity.

Structure | Contact Page

Contact form layout will be kept as simple as possible to allow users to easily access contact information or submit information in contact form.

Main Challenge

One main challenge was the ability of being able to think ahead and continually formatting css code.

Some elements required me to return to the component and update code which would result in more css being added or css being amended at previous areas of the code. This meant keeping to a structured css format was difficult and still required refactoring of css code in the end.

Main Ethical Issue

Part of the assignment was to create a contact form, as most of us don't have the ability to make a functioning form where users can input information to be sent to the developer.

Understanding that this portfolio is going onto a public domain without a function contact form is okay for now as this is a draft version of our website and we will be able to continually update it after assessment submission.
